**An Essay on Rabbits.**  
There are many kinds of rabbits besides the Welsh kind and Belgian hares. The rabbit is what some people haven't any more sense than.

Rabbits are great mathematicians. They multiply with much rapidity and are good to eat in addition. Almost any fried rabbit is big enough to divide.

When we were boys we used to live in our alimentary canals near the root of a tular tree where a dog had chased a closely-pursed bunny to squatter himself and twist at that entrenched cat till we had so much of his foliage on the ground that we were using that he was glad to come out and join the majority of his fleecy.

This was rank cruelty from a humane standpoint, but it is part of a regular boy's normal life, so why placate the rag and get horrified over it? If you are fond of young fruit trees and rabbits, you are doomed to have a one-sided happiness in your life, for you will have to give up one or the other.

A 10-cent rabbit with its belly full of the vital sap bark of a \$12 apple tree is the happiest thing ever.
